

WorkAlign[®] IIoT

VIZIYA WorkAlign® IIoT

The VIZIYA WorkAlign IIoT is a powerful, robust solution that allows you to capture and analyze real time sensor data generated by your assets, assign parameters to that data, feed it into your CMMS and use push notifications and text messages to generate a work order to your mobile device.

The Industrial Internet of Things is the latest buzz word in the industry. VIZIYA has developed the IIoT to connect your real-time sensor data with your CMMS, and make that data actionable. This means you can easily determine what actions to take when an event occurs within your system. The IIoT allows you to connect your assets at an entirely new level.

Using the IIoT, you will become a more predictive maintenance organization – all from an easy to use mobile application.

BENEFITS

Ensures your maintenance organization is up to speed in the latest predictive technology

• Modernize your processes

Integrates your sensor data with your ERP system in real time

- Manage your data in a way that makes sense
- Create actions from your data

Foster a predictive (rather than reactive) maintenance program

- More efficiently use resources
- Better understand your asset life cycles

Increase the efficiency of your maintenance team

Actions can take place in real time on the shop floor

FEATURES

- Captures real time data from your assets
- Simple, user friendly U/X
