

AMITEC

SMS Notification

Simple notification – anywhere, anytime!

Amitec SMS Notification – the first SMS plug-in designed to send SMS notifications directly from OSIsoft's PI Notification / Asset Framework (PI AF). It's a flexible and intuitive tool which fully integrates with PI System Explorer.

It's easy to install, configure and use, and supports the new Notification Rules in AF

Easy as 1-2-3

1. Install

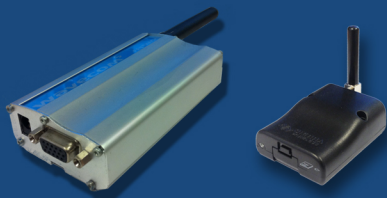

Straight forward;
no dependencies – just your
existing AF database
and PI System

2. Configure

Add username and password
for your SMS gateway account,
and add an SMS notification
in PI System Explorer

3. Use

Subscribe local AF users or
Active Directory users directly
with drag'n drop, and "press
play" to start!

GSM Module

Also support for GSM modules in addition to online
SMS Gateway providers.

Can be provided along with the plug-in from Amitec!
